Welcome to Chelsea Heights Community Garden!

- **HEALTH** – A First aid kit and emergency contact numbers are available in the front (cream) shed. We strongly recommend a tetanus shot (as we use horse manure). We have beehives & encourage beneficial insects into the garden. If you have any allergies, please be aware & take what precautions you need. All garden members MUST follow the Chelsea Heights Community Centre COVID safe plan and Victorian government restrictions in place. This includes signing-in by QR code or the sign-in book in the shelter.
- **GARDEN ENTRANCE** – The code to the gate lock will be given upon completion of the induction and full payment of fees. Please lock up if you are the last to leave and please do not share the code with anyone.
- **WHAT YOU NEED TO BRING** - Drinking water (no drinkable water available in the garden), gloves, appropriate closed foot ware, hat, sunscreen, insect repellent, hand sanitiser and masks.
- **GARDENING DURING THE WEEK** – Wednesday mornings from around 10.30am you will find people in the garden. Gardening together is much more fun than gardening alone, so come along and join in, and get some handy hints along the way. Bring a snack and we'll put the kettle on!
- **WORKING BEES** – are held on the **3rd Sunday of every month, starting at 10am.** It's lots of fun, with gardening, eating, socialising, and learning. Bring the kids along too. We encourage you to join us more often than the minimum of 3 times a year, as per our application form. Please refer to the calendar overleaf.
- **EVENTS** – Occasionally we hold events like an Open Day or Classes – all members will be informed & encouraged to participate.
- **WATER** – Be water wise, we only have limited tank water (not for drinking so please bring your own). Remember to turn the water taps **OFF**, regardless of if there is time left on the timers. **DO NOT** force timers back to Zero.
- **WE ARE AN ORGANIC GARDEN** so only organic/biological sprays & fertilisers are permitted. Nourishing the soil is your 1st priority.
- **COMPOST** – Good compost = good plants. Come along and help us make it and you can take this skill home. Diseased plants and tomato plants are to be put into the general waste bin.
- **PICKING PRODUCE** – Please only pick from communal areas if particular produce has been 'advertised' via Slack. Otherwise, communal produce will be placed on the 'share table' or 'esky' in the shelter. **Please take only your fair share.** Herbs can be picked fresh from the garden anytime.
